Project Summary

Client: —

BODEGA BLOCKS

Bodega Blocks is the first NFT project that integrates isometric generative art with unique utility and innovative NFTomics that stabilize the floor price by using a deflationary supply model with appreciating, passive USDT stable coin rewards to holders. Bodega is developing an interactive 3D CUBE platform that will showcase the Bodegas on land parcels and aims to promote artists/collections in the NFT space by integrating their art onto the Bodegas in various .forms while providing utility and value for holders

Bodega Blocks Provided The Following Smart Contracts For Static Analysis and Dynamic Analysis:

Bodega NFT Mint Testnet Contract: 0xAEA8Cf1688809Ed42B28376a4970Ee1aF2614028

Bodega Claim Testnet Contract: 0xfb620397d8Bcf0683B9c24DB1AB99ad79C3801Dc

Disclaimer:

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and Sky Pegasus LLC and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers, and other representatives) (Sky Pegasus LLC) owe no duty of care towards you or any other person, nor does Sky Pegasus LLC make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties, or other terms of any kind except as set out in this disclaimer, and Sky Pegasus LLC hereby excludes all representations, warranties, conditions, and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, Sky Pegasus LLC hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against Sky Pegasus LLC, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of the use of this report, and any reliance on this report.

Audit Process

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

This document details Sky Pegasus LLC's findings and recommended solutions. Our audit was performed in the weeks leading up to October 25, 2022. The contract we audited has yet to be deployed.

Static Analysis + Dynamic Analysis

Static analysis examines code to identify issues within the logic and techniques. This type of analysis addresses weaknesses in source code that might lead to vulnerabilities. The static analysis supports Development operations by creating an automated feedback loop. Static review can lead to false positives/negatives which Sky Pegasus confirms or denies with penetration testing. Static analysis is being used on Bodega Blocks because it specifically identifies defects before you run a program (e.g. between coding and unit testing).

The dynamic analysis finds vulnerabilities in a runtime environment. Automated tools analyze the input and output of an application for potential threats like SQL injection. Tools can also search for other application-specific issues and analyze server configuration errors. The purpose of dynamic analysis is to analyze the program as an attacker would, looking for entry points and vulnerable sections during program execution. Hence, We create a well-written suite of manual ran unit and regression tests,
